Antoine Malignon

Junior Developer

About Me

Junior Developer with hands-on experience building real-time full-stack apps (TypeScript, Fastify, Vite, Tailwind), systems-level C/C++ projects (HTTP server, Unix shell), and containerized stacks (Docker, NGINX, MariaDB, WordPress). 42 Malaysia Core Program graduate (Level 9/9), currently advancing through the Advanced track; strong grounding in algorithms, networking, and operating systems.

Work Experience

2024 - 2026
Sunway FutureX
Program Facilitator

- Facilitated python program to help corporate employees up-skill to automate workflow.

Projects

ft_transcendence   github link
- Real-time full-stack app (Node.js, Fasitfy, Tailwind, Vite).
- Worked on game engine logic and front-end intergration

irc   github link
- Developed a chatting server following the irc protocol in C.

inception   github link
- Built scalable, modular Docker stack with NGINX, MariaDB, Wordpress.

minishell   github link
- Built a basic UNIX shell supporting pipes, redirection and parsing.

push_swap   github link
- Applied logic optimization and systems design skills in time-boxed sprints.
